Sterling Silver Rings for Women

Our Crescent Ring has a slight indentation that allows for its moon like shape. This understated piece is made to be worn solo, or stacked with other rings from our collection, like the [Unique Sterling Silver Rings](#). It can also be paired with the Gold version for a two-tone look.

Please note this piece is hand cast, therefore slight variations may occur due to the casting process.

Gold and Silver Ring for Women | Maslo Jewelry

Similar to our mountain range-inspired [Gold and Silver Round Peak rings](#), the eye is drawn upward by the curve that gives this tall, statement ring its commanding height.

Also available in Sterling Silver.

Please note this piece is hand cast, therefore slight variations may occur due to the casting process.
